Whenever the Powerball jackpot reaches a record level, the amount of the jackpot prize will be limited, by rule, to increase for each drawing of no more than \$25 million. The prize money collected in excess of the advertised jackpot amount, if any, will be placed into a bonus prize pool and will accumulate until there is a jackpot winner. When there is a jackpot winner, the bonus prize pool will be divided equally among all winners of the \$200,000 prize. The bonus will be paid to winners as one lump-sum cash payment.

***Match 5 winners who added Power Play for that drawing will automatically win 5 times the regular prize amount—\$1 million—no matter what Power Play number was drawn. In some cases, this prize may be paid on a pari-mutuel basis and will be lower.

Powerball® with Power Play™

Millions of Reasons to Play!

Powerball jackpots start at \$20 million and continue to climb until someone wins. That someone could be you! To play, just pick five numbers from 1 to 59 (the white balls), then pick one more number from 1 to 39 (the red Powerball). You win the jackpot if you match all five white balls plus the red “Powerball”. In addition to the jackpot, Powerball has eight other ways to win set cash prize amounts.

Powerball drawings are held at 9:59 p.m. every Wednesday and Saturday. To be eligible on the nights of the drawings you must purchase your Powerball tickets before 9 p.m. If you win the jackpot, you have 60 days after you claim your prize to determine how you want to be paid. You can be paid in 30 annual payments over 29 years or in one lump-sum cash payment. If you choose the annuity, the annual payments will be increased each year by a percentage set out in the Powerball game procedures. The cash payment is about half of the estimated annuitized jackpot amount.

How to Play Powerball

1. Get a Powerball play slip from any Minnesota State Lottery retailer and follow the directions on the back. Or simply ask the clerk for a QUICK PICK and random numbers will be picked for you.
2. Each play will cost you \$1—unless you add “Power Play” or extra draws.
3. You can purchase up to 14 draws in advance. Remember, your cost increases for each draw you add.
4. Powerball tickets cannot be canceled so please check your play slip carefully before you hand it to the retailer.
5. Give your play slip to the Lottery retailer and receive a computer-printed ticket. The ticket is the only valid receipt for claiming a prize. The play slip is not a valid receipt.

How to Add Power to Your Play

Before the Powerball numbers are drawn on each Powerball drawing night, a Power Play® multiplier number from 2 through 5 is randomly selected. If you win a prize on your Powerball ticket, other than the jackpot, and you have purchased Power Play on that ticket, you receive the regular prize amount MULTIPLIED by the Power Play multiplier number that was selected. Match 5 winners who added Power Play for that drawing will automatically win 5 times the regular prize amount—\$1 million—no matter what Power Play number was drawn. In some cases, this prize may be paid on a pari-mutuel basis and will be lower. When you redeem your ticket, the increase is automatically calculated by the Lottery. Example: If you win \$7 on Powerball and have purchased Power Play, and the Power Play multiplier number for that drawing is “3”—your prize jumps to \$21! (\$7 x 3 = \$21).

NOTE: You must add Power Play at the time you purchase your Powerball tickets. Ask the clerk to add it or indicate Power Play on your play slip. Each time you add an additional draw or an additional play that includes Power Play, it will cost you an additional \$1 per play and per draw. When you add Power Play to any Powerball ticket, it doubles the cost for that Powerball ticket. Example: If you fill in all 5 plays on the play slip and select 3 draws—without Power Play—the ticket costs you \$15 (5 x 3 x \$1 = \$15). But if you add Power Play to this ticket, your cost would be \$30 (5 x 3 x \$2 = \$30).

Mega Millions®

What's Your Dream?

Mega Millions is a multi-state lotto game where jackpots start at \$12 million and keep climbing until someone wins! There are big non-jackpot prizes, too—up to \$250,000!—and, if you add Megaplier® to your ticket, you could win up to \$1 million!

To play, pick five numbers from 1 to 56 (the white balls) plus one more number—the Mega Ball®—from 1 to 46. You win the jackpot if you match all five white balls plus the Mega Ball. In addition to the jackpot, there are eight ways to win set cash prize amounts.

Mega Millions drawings are held every Tuesday and Friday at 10 p.m. To be eligible on the nights of the drawings you must purchase your Mega Millions tickets before 9 p.m. If you win the jackpot, you have 60 days after you claim your prize to determine how you want to be paid. You can be paid in 26 equal annual payments OR in one lump-sum cash payment. The cash payment is about half of the estimated annuitized jackpot amount.

Multiply Your Win with Megaplier®!

At the time of purchase, for an extra \$1 per play, you can add the Megaplier option for the chance to multiply your prize (except the jackpot) by two, three or four times. Each night of the drawing, a Megaplier number is randomly selected. If you win a prize on your Mega Millions ticket (except the jackpot), and have purchased the Megaplier option, you receive the regular prize amount MULTIPLIED by the Megaplier number that was selected. For example, if you win \$10 on Mega Millions and have added Megaplier to that ticket, and the Megaplier number is “3”—your prize climbs to \$30 (\$10 x 3 = \$30).
